Landscape Plan, page 2. Mulch bed with Eastern Arborvitae (*Thuja occidentalis*), or similar evergreen tree plantings, will provide year-round screening to the north, and is approximated by yellow shape below. Additional screening is provided by existing trees that line property line to the northeast, east and southeast, as noted by arrows.

Existing trees provide screening along the northwest corridor from the pad.

Yellow field with numbers indicate approximate location of six evergreen trees to be planted on 5' centers per Terraspec recommendation.

Existing mature evergreen trees (red arrows) provide extensive screening to the northeast, east and southeast.

Elevation Plan. See the labeled High Point, with reference elevation of 100'. Approximately 6" of earth relative to the existing landscaping will be excavated and sloped down to the sports court. The court pad will slope at approximately ¼" per foot away from the High Point and will approximately match the existing drainage profile.
